List Add content type Fields

Name	Type	Description	Operations
Albums	albums		edit manage fields delete
Bandas	bandas		edit manage fields delete
Imágenes	imagenes		edit manage fields delete
Page	page	A <i>page</i> , similar in form to a <i>story</i> , is a simple method for creating and displaying information that rarely changes, such as an "About us" section of a website. By default, a <i>page</i> entry does not allow visitor comments and is not featured on the site's initial home page.	edit manage fields delete
Story	story	A <i>story</i> , similar in form to a <i>page</i> , is ideal for creating and displaying content that informs or engages website visitors. Press releases, site announcements, and informal blog-like entries may all be created with a <i>story</i> entry. By default, a <i>story</i> entry is automatically featured on the site's initial home page, and provides the ability to post comments.	edit manage fields delete
Videos	videos		edit manage fields delete

Remove display

Defaults: Configure Argument *Banda (field_bandas)*

TITLE:

The title to use when this argument is present. It will override the title of the view and titles from previous arguments. You can use percent substitution here to replace with argument titles. Use "%1" for the first argument, "%2" for the second, etc.

BREADCRUMB:

The Breadcrumb title to use when this argument is present. If no breadcrumb is set here, default Title values will be used, see "Title" for percent substitutions.

ACTION TO TAKE IF ARGUMENT IS NOT PRESENT:

- Display all values
- Hide view / Page not found (404)
- Display empty text
- Summary, sorted ascending
- Summary, sorted descending
- Provide default argument

Provide default argument options

DEFAULT ARGUMENT TYPE:

- Fixed entry
- Node ID from URL
- PHP Code
- Taxonomy Term ID from URL
- User ID from URL
- User ID from logged in user

Validator options

VALIDATOR:

<Basic validation> ▾

ACTION TO TAKE IF ARGUMENT DOES NOT VALIDATE:

Hide view / Page not found (404) ▾

- Allow multiple terms per argument.

If selected, users can enter multiple arguments in the form of 1+2+3 or 1,2,3.

- Exclude the argument

If selected, the numbers entered in the argument will be excluded rather than limiting the view.

WILDCARD:

all

If this value is received as an argument, the argument will be ignored; i.e, "all values"

WILDCARD TITLE:

All

The title to use for the wildcard in substitutions elsewhere.
